Severe Weather Outlook Thursday, July 06, 2017

National Weather Service
Storm Prediction Center

<http://www.spc.noaa.gov>

Hazardous Weather

Isolated showers and thunderstorms are possible today, mainly along the sea breeze, with another round of triple digit heat expected. High temperatures will range from the mid and upper 90s to a couple of degrees beyond 100, with heat indices even higher. Remember to stay hydrated, wear loose-fitting and light-colored clothing, seek out shade or air conditioning whenever possible and re-apply sunblock often. There will be a light chop on the Laguna Madre and Gulf seas of 2-4 feet and occasionally 5 feet offshore with southeast winds around 10 knots

Thursday

f t v NWSEIPaso

weather.gov/epz

Temperatures will creep up a couple degrees across the area, with afternoon thunderstorms mainly over the higher terrain. A few storms will approach the lowlands towards the late afternoon, mainly favoring areas outside the El Paso/Las Cruces area

Hazardous Weather

Unseasonably Cool Again Today

...with a chance of thunderstorms south.

Weather Forecast Office

Midland/Odessa, TX

Issued July 6, 2017 2:18 AM CT

Today

Tonight

 [NWSMidland](#)

weather.gov/maf

Unseasonably cool temperatures are expected again today. Otherwise, thunderstorms will be possible again, mainly south of Interstate 20. Any storms that do develop will be accompanied by frequent lightning, gusty winds, small hail, and heavy rainfall that may result in localized flash flooding

A Few Storms Today

- * Showers mainly south this morning
- * A few storms this evening, but less than past days
- * Gusty winds and some lightning
- * Highs - low to mid 90s

National Weather Service San Angelo, TX Updated Jul 08 5:28AM

A few showers will linger this morning across the Edwards Plateau and Hill Country. Clouds and lots of low level moisture will keep temperatures in the 90s. A few evening thunderstorms will be possible, mainly south, but not as much coverage as we saw earlier this week.

Hazardous Weather

A weak upper level trough will bring a chance of showers and storms to parts of the forecast area again today. The better rain chances will likely shift to areas along and south of I-20 as the upper trough shifts southeast, and may be focused along the remains of an outflow boundary from yesterday's activity. Coverage should remain isolated to widely scattered, but the slow-storm motion could again lead to localized flash flooding. A few storms may also be strong with frequent lightning and gusty winds

Regional Outlook 07/06/2017

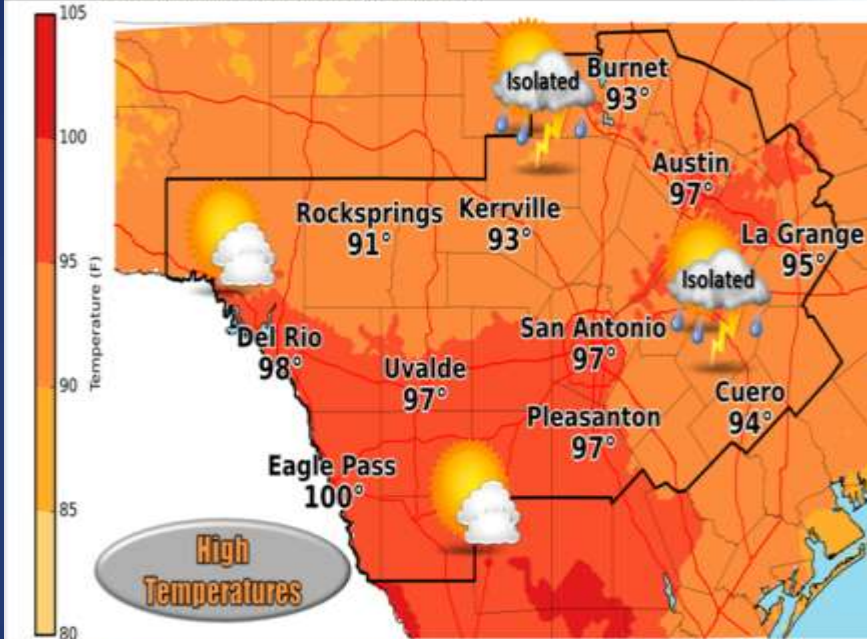

Broken Bow	Texarkana	El Dorado	Tyler	Shreveport	Monroe	Natchitoches	Lufkin

20%	20%	30%	30%	30%	30%	30%	30%
71	72	73	75	75	74	75	74

An area of showers and thunderstorms will continue to move slowly to the ENE through mid morning across portions of extreme SE Oklahoma and adjacent SW Arkansas. These storms are expected to diminish by mid morning, but with daytime heating and a weak surface front, additional widely scattered thunderstorms are possible this afternoon across the rest of the region. Otherwise, high temperatures in the upper 80s to low 90s is expected today with heat index readings near 100 degrees

Hazardous Weather

Isolated Storms Over Hill Country & Coastal Plains - Continued Hot

National Weather Service Austin / San Antonio

YouTube f @NWSanAntonio
weather.gov/ewx

Showers and a few storms will shift across the Edwards Plateau but remain north of the Hill country this morning. However, isolated scattered showers will be possible this afternoon for the Hill Country and near Austin. The rest of South Central Texas will remain dry. By this afternoon skies will clear leading to sunny, hot, and dry conditions. After heat index values will range from 100 to 105 in many spots, so take precautions to stay cool and hydrated.

Today

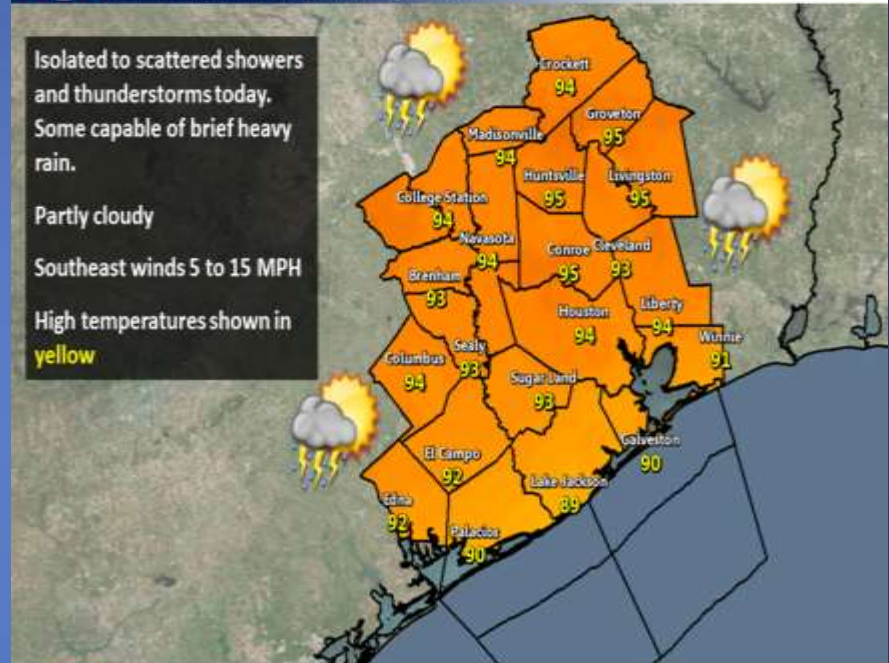

National Weather Service Houston/Galveston

Isolated to scattered showers and thunderstorms today. Some capable of brief heavy rain.

Partly cloudy

Southeast winds 5 to 15 MPH

High temperatures shown in yellow
